FAQ #5: Impact of AI Agents?

Hyperscalers Benefit From Increased Utilization... with Broader Internet Increasingly Controversial

Agentic Platforms Increasingly Push User Handoff Deeper Down

AI / Agent Involvement

- Search → AI Overviews → AI Mode
- Chatbots (ChatGPT, Claude, Perplexity, Gemini)
- OpenClaw / Hermes
- Claude Cowork / ChatGPT Code/Codex
- Gemini Spark
- ChatGPT Work
- Grok Bot
- Instinct
- Meta Muse

Respond to Queries

- Replies with a response / answer
- Example: agent shows where to find a product

Perform Some Tasks

- Agent does some work, but user required
- Example: agent fills the cart, but user completes

Complete Work/Projects

- User returns to finished tasks
- Example: agent fills the cart and transacts

User Involvement

Value Accrues to Platforms That Provide Highest Value per Time & Dollar Spent

Consumers

- Agentic platforms began by providing better answers for performing some tasks and completing work
- With capabilities increasing to navigate discovery, intent, transaction, work, etc.
- We are focused on whether agents can provide a high-quality, low friction experience that is superior to current traffic providers and vertical platforms

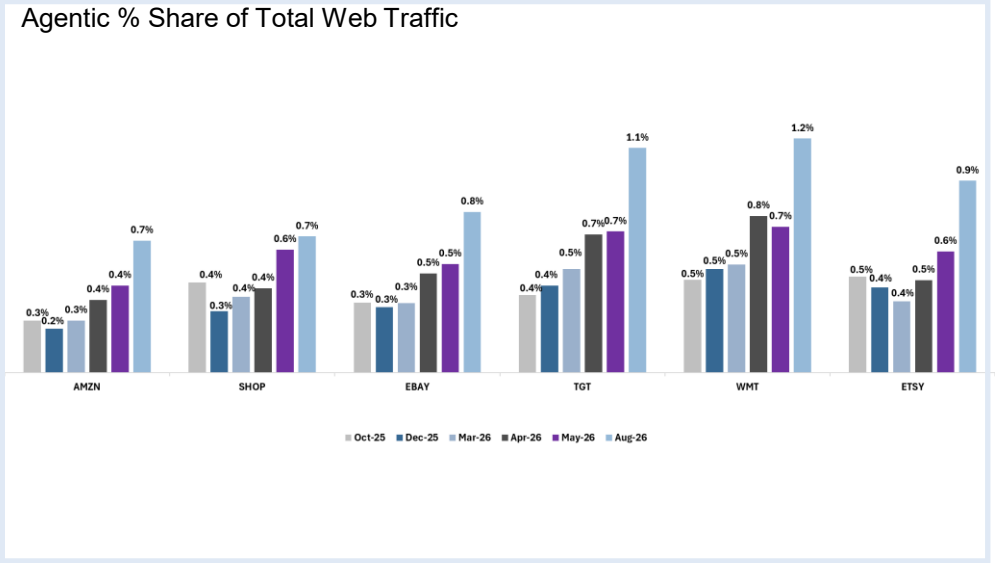

Suppliers

- Agentic platforms may lack breadth/depth of direct relationships with suppliers to provide high-quality consumer experiences
- Therefore, agentic workflows are currently dependent on established platforms & early connectors
- But ultimately more interactions should be done agent-to-agent between consumers and businesses

1 Amazon (Overweight, $365 PT)

AWS Acceleration & Backlog Build, w/Operating Profit Upside

Why We Think It Outperforms

1. **AWS growth accelerates, supported by core workloads/migrations, and AI adoption**
   - 2Q backlog +36% Q/Q to $496B w/Anthropic ($100B/10 years), & OpenAI ($138B/8 years) commitments
   - AWS' AI and chips businesses each exceeded $25B+ ARR in 2Q & grew triple-digits, w/some overlap
   - Consensus AWS growth for '27 at 34% FXN implies significant decel and likely conservative
   - Strong secular growth (~80%+ of IT spend still on-prem) & AWS doubling GW capacity 2025 to 2027
2. **Solid Stores growth & leading share driven by secular shift, SD1D, everyday essentials, 3P, Prime**
   - E-comm ~23% of US Retail Sales & large verticals (CPG/grocery, Apparel) mostly offline
   - Units accel to +17% in 2Q, speed of delivery increasing w/SD1D accounting for 40%+ of items
3. **AWS, Ads, & N.America/Int'l cost to serve reductions drive OI margin expansion against capex ramp**
   - Confident in ROIC on AI invest/, w/2Q AWS OI margins up ~650bps to 39.4%, ~37.4% '26e AWS margins
   - N.America/Int'l OI margin expansion supported by lower cost to serve, inbound inventory optimization, robotics/automation, SD, Ads; JPMe 7.9% NA (+96bps Y/Y) & 3.9% Int'l (+92bps Y/Y) OI margins in '26
4. **AMZN diversified across revs/profit & has various large growth opportunities**
5. **Attractive valuation at 20x '28E GAAP P/E**

Where We Expect Pushback

1) Heavy capex drives multi-year FCF burn (until 2030), curbs OI & GAAP EPS growth; **2)** Risk from FTC lawsuit related to AMZN Advertising; **3)** AWS relative growth & $s added vs. Azure/GC; **4)** State of US consumer mixed; **5)** e-Comm competition from WMT, Asia, Agentic;**6)** Higher fuel costs & linehaul rates

5. **Waymo expanding to 20 new cities in '26, incl int'l… targeting 1M trips/week by end of '26**

Where We Expect Pushback

1) Heavy capex weighs on FCF, debt/equity raises, & depreciation pressures margins; **2)** LLM competition, w/Gemini falling behind in frontier race, & talent retention / acquisition; **3)** AI search transition still ongoing w/risks from ChatGPT ad ramp; **4)** High expectations for Google Cloud growth/backlog

Recent Upgrade

Meta (Overweight, $820 PT)

Frontier Models and AI-Driven Products Releases are Early with Meaningful Headroom in Core Advertising

Why We Think It Outperforms

1. **Frontier models are at the core of the AI product and monetization pipeline**
   - Meta's MSL team has accelerated launch cadence, w/Muse Spark 1.3 pushing the frontier
   - Meta's more advanced model, Watermelon, should represent another meaningful improvement
   - Models unlock opportunities in consumer/enterprise products, FoA engagement & core advertising
2. **Muse AI Agent is Meta's first true consumer AI product & is off to a strong start**
   - Strong app store rankings, early virality, & engagement running 10x the rate of training cohorts
   - Meta has the advantage of distribution across its 4B users & over time we expect Meta to monetize on a take rate or commission model, w/interactions becoming more agent-to-agent
3. **Model API access represents enterprise & coding opportunity**
   - Increasingly compelling as Meta's models strengthen from Muse Spark 1.3 to Watermelon & beyond
   - Supported by highly competitive pricing which should drive increased adoption
4. **Meaningful headroom in core advertising**
   - AI-driven improvements to content recommendations and engagement, better ad targeting and retrieval, and AI content creation

Where We Expect Pushback

1) Models & early AI product path show progress, but need monetization & return on spending; **2)** Competition around frontier models & agents will intensify; **3)** Heavy capex, FCF burn, & capital raises will persist for at least a few years; **4)** Teen safety impact to engagement/users TBD & outstanding case headlines will continue

Key JPM 2027 Estimates	Ad Revenue +19.9% Y/Y to $297B	GAAP Operating Expenses +24% Y/Y to $207B	Capex +70% Y/Y to $243B	FCF ($69B)	GAAP EPS +2% Y/Y to $31.85

Source: All projections are J.P. Morgan estimates, historical US retail & e-commerce sales numbers are from the US Department of Commerce. Notes: *Retail Sales excludes food services & drinking places and Adjusted Retail Sales also excludes automobile & other motor vehicle dealers and gasoline stations; **We assume the US represents 95% of Amazon's North America GMV; ***AMZN as a % of Adjusted Retail Sales includes Physical Stores (Whole Foods) GMV; ****We assume that POS comprises 11% of Global GMV & that the US comprises ~51% of Global GMV.

Analyst Certification: The Research Analyst(s) denoted by an "AC" on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an "AC" on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst's personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst's analysis was made in good faith and that the views reflect the Research Analyst's own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting https://www.jpmm.com/research/disclosures, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.
